## Description

The next-generation F90 is a direct-evolution of the previous 1.5 litre model, delivering increased fuel-efficiency, reduced-weight and improved performance. Filling an important place in Yamaha's class-leading mid-range line-up, the new F90 delivers the perfect power option for the large number of Aussie built boats that have a maximum hull rating of 90 horsepower. The four-cylinder, 16-valve, SOHC 1.8L marine engine, is not only 10KGs lighter, but an increase in displacement over the previous generation 1.5L engine aids in a richer torque-band.

The reduction in weight and improved compactness has been achieved through the adoption of a single overhead camshaft valve-train, delivers smooth and efficient performance only seen in 16-valve, four-cylinder engines of this size. The new F90 delivers a 10% improvement in fuel-efficiency and a significant reduction in noise, through improved engine unit rigidity, muffler redesign and the addition of an intake silencer. The Yamaha F90 is compatible with Yamaha's range of Command-Link gauges, while its NMEA2000 compatibility allows for easy integration with third-party multi-function displays, GPS and fish finders. To find out more about the VMAX SHO 90, [please click here](#)

The 90 horsepower is now available in both traditional Yamaha grey and new pearlescent white colour options, in both long and extra long shaft length.

Technical Specification  
HeightL: 516 [20.3] | X: 643 [25.3]

WeightL: 162 | X: 166

Engine4-Stroke, 16 Valve SOHC In-line 4 Cylinder

Displacement1832.0

Bore81 X 88.9

Max RPM5000 - 6000
