Description

The 2024 JetBlaster delivers an exciting, freestyle riding experience like no other sit down watercraft before.

Inspired by the agility and manoeuvrability of Yamaha's legendary SuperJet, this craft combines the freedom of a stand-up with the versatility of a sit-down personal watercraft, to deliver next level thrills and performance.

The key to the unique performance and innovative design is the custom-tuned electric trim, built-in footwell chocks and raised action handlebars.

The electric trim gives the rider the ability to pop out of the water, do spins and other exciting maneuvers, while the built-in footwell chocks, located towards the rear of the craft, allow the rider to adjust their riding position when freestyle riding.

The wide mounted, high action handlebars, provide increased leverage over the craft, allowing the rider to quickly change direction and execute extreme moves with ease.

In addition to these unique features, the JetBlaster comes with an extremely light-weight and compact hull - combined with Yamaha's award-winning TR-1 High Output purpose-built marine engine - delivering an extremely powerful and agile on-water performance.

Hitting the water has never been this much fun!
