## Description

The 2024 VX Cruiser HO (High Output), Yamaha's number one selling personal watercraft globally, now comes with Yamaha's all-new 1.9 Litre High Output marine engine, combining with cutting edge technologies and features, to deliver an extremely versatile and affordable package.

This new engine, replaces the former 1.8 Litre High Output marine engine, with the larger capacity delivering quicker and smoother acceleration and higher top-end speed.

The VX Cruiser HO comes with a theatre-style bolstered seat for ultimate riding comfort for up to three people, as well as 2 pull-up cleats for easy tie ups to docks and other watercraft.

Above the water line the VX deck delivers excellent rider ergonomics and comfort with deep and wide, self-draining footwells and a narrow seat profile.

The dashboard comes with a 4.3" Connex LCD display with customisable speed and PIN security controls, a multi-mount system for attaching your favourite digital accessories, a user-friendly and water-resistant storage space for packing all your gear and a feature packed glove box with charging ports and LED lighting.

Like all VX Series WaveRunners, this craft is compatible with Yamaha's exclusive RecDeck platform, allowing you to connect various JetFish and lounge accessory packages, for more on-water action and versatility.

If you are looking for an extreme power and heaps of features in a mid-sized personal watercraft package, then the VX Cruiser HO is the WaveRunner for you.

Technical Specification
